© 1994

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☒ Coloured covers/
Couverture de couleur
- ☒ Covers damaged/
Couverture endommagée
- ☐ Covers restored and/or laminated/
Couverture restaurée et/ou pelliculée
- ☐ Cover title missing/
Le titre de couverture manque
- ☐ Coloured maps/
Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black)/
Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations/
Planches et/ou illustrations en couleur
- ☐ Bound with other material/
Relié avec d'autres documents
- ☐ Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distorsion le long de la marge intérieure
- ☐ Blank leaves added during restoration may appear
within the text. Whenever possible, these have
been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.

- ☐ Coloured pages/
Pages de couleur
- ☒ Pages damaged/
Pages endommagées
- ☐ Pages restored and/or laminated/
Pages restaurées et/ou pelliculées
- ☒ Pages discoloured, stained or foxed/
Pages décolorées, tachetées ou piquées
- ☐ Pages detached/
Pages détachées
- ☒ Showthrough/
Transparence
- ☐ Quality of print varies/
Qualité inégale de l'impression
- ☐ Continuous pagination/
Pagination continue
- ☒ Includes index(es)/
Comprend un (des) index
- Title on header taken from: /
Le titre de l'en-tête provient:
- ☐ Title page of issue/
Page de titre de la livraison
- ☐ Caption of issue/
Titre de départ de la livraison
- ☐ Masthead/
Générique (périodiques) de la livraison

- ☒ Additional comments: / Part of pages 5-8 is missing.
Commentaires supplémentaires: Copy has manuscript annotations.

This item is filmed at the reduction ratio checked below/
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	12X	14X	16X	18X	20X	22X	24X	26X	28X	30X	32X
☐	☐	☐	☐	☐	☐	☐	☒	☐	☐	☐	☐

The copy filmed here has been reproduced thanks to the generosity of:

Thomas Fisher Rare Book Library,
University of Toronto Library

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Thomas Fisher Rare Book Library,
University of Toronto Library

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

DAVIS PARLOR DOOR HANGERS.

FOR SLIDING DOORS.

Patented Feb. 6, 1899.

DOOR HANGS FROM TOP, DISPENSING WITH TRACK ON FLOOR.

THE DAVIS PARLOR DOOR HANGER embodies all the important features of other Parlor Door Hangers, and has the following additional advantages :

1. It is *entirely* concealed from view.
2. It can be put up in one-fourth the time, and consequently at one-fourth the cost of any other make.
3. No plates are required at edge of door, and no cutting of door is necessary in fitting it.

It is fastened to top of door by long square head coach screws in a most substantial manner, and will carry 1,000 lbs. without strain ; is absolutely noiseless, requires no oiling, and cannot get off the track ; is easily adjusted by the turning of a screw to raise or lower door ; is self-adjusting to any unevenness of track, and bears equally on both rails of track under all circumstances.

Packed, one set in wooden box, per set, \$6 00

A set consists of four hangers with screws for raising and lowering, two pocket plates, two floor guides, one wrench, two double striking plates, twenty-eight feet hardwood track, two stop plates, eight coach screws.

One set will hang two doors. For single doors, use half a set.

SAD IRONS.

(Original Design, Registered.)

We supply all sizes from 6 to 10 lbs. each in above style, which has extra heavy point, giving extra pressure where most needed. This will be found a decided improvement over the old style in ease of working and general efficiency. For the present we supply the four and five-pound irons in old style ordinary point only.

Sizes, 4, 5, 6, 7, 8, 9 and 10 lbs. each.

PEERLESS AUTOMATIC BORING MACHINE.

THE VERY BEST.

STEEL FRAME. WOOD BASE.

This machine has been fully perfected in all its parts, and is now sold with the full warrant that it will do better work, and give better satisfaction, than any other kind in use. The frame is made of half inch round steel rods; the braces are the same and attach to the rods at the top by a set screw. When this set screw is loosened, the frame falls over so as to bore at any desired angle.

The No. 1 machine is wholly automatic, when the right depth is reached the Auger comes to a full stop, the next turn loosens the screw; then it falls into gear and is drawn out of the hole without slackening the speed or changing the motion. When raised to the top the gate hangs itself up until the machine is moved to the next hole, then, by turning the crank in same direction, it unhooks itself and descends to its work. During all these movements the hands are not removed from the cranks. The No. 2 machine is same as No. 1, except that the shifting is done with a lever moved by the hand. As seen in the cut, the machine has adjustable cranks, which fully regulate its speed and power.

The gears on this machine are all cut.

For most purposes we recommend the No. 2 machine, as it is less complicated.

Complete with Augers. One each $1\frac{1}{4}$, $1\frac{1}{2}$, and 2 inch.

IMPROVED PARAGON COMBINED SCHOOL DESKS AND SEATS.

Ash Woods, Polished and Varnished. Japanned Castings.

Best Selected Woods, Superior Construction, and Extra Finish.

SIX SIZES:

No. 6, PRIMARY. For Pupils of 4 to 6 years.	
Top of Desk,	21½ in. high
Front of Seat,	11 in. high
Single Desk,	18 in. long
Double Desk,	36 in. long
Width of Top,	21 in.
Space occupied,	25 in.

No. 3, INTERMEDIATE. For Pupils of 10 to 13 years.	
Top of Desk,	26½ in. high
Front of Seat,	14½ in. high
Single Desk,	21 in. long
Double Desk,	42 in. long
Width of Top,	14 in.
Space occupied,	29 in.

No. 5, PRIMARY. For Pupils of 5 to 8 years.	
Top of Desk,	23 in. high
Front of Seat,	12½ in. high
Single Desk,	18 in. long
Double Desk,	36 in. long
Width of Top,	12 in.
Space occupied,	26 in.

No. 2, GRAMMAR. For Pupils of 12 to 15 years.	
Top of Desk,	28½ in. high
Front of Seat,	16 in. high
Single Desk,	24 in. long
Double Desk,	42 in. long
Width of Top,	15 in.
Space occupied,	31 in.

No. 4, INTERMEDIATE. For Pupils of 8 to 11 years.	
Top of Desk,	24½ in. high
Front of Seat,	13½ in. high
Single Desk,	21 in. long
Double Desk,	42 in. long
Width of Top,	13 in.
Space occupied,	28 in.

No. 1, HIGH SCHOOL. For Pupils of 15 to 20 years.	
Top of Desk,	30 in. high
Front of Seat,	17½ in. high
Single Desk,	24 in. long
Double Desk,	42 in. long

PUMPS.

WE devote special attention to this branch of our business. Our pumps are made with the greatest possible care, from the very best materials, and of latest designs in every style, and we *guarantee every Pump* sent out to be *perfect working* and equal in every respect to best American makes. If found defective after being put in use, we will replace *free*, and pay all charges for transportation.

On following pages of our Catalogue we illustrate the various styles of pumps we supply. Detailed descriptions are given with each design, showing manner of construction, purposes for which used, capacity, etc.

For the benefit of those not familiar with Pumps, we offer in this connection a few general remarks on the subject.

The necessary parts of a Pump are the Cylinder, Plunger, Check Valve, and Suction or Connecting Pipe: and in order that a Pump may do its work properly, all these parts should be in perfect order. The Cylinder should be bored true, and should be air-tight; and the Plunger should fit it accurately, so that it will make a vacuum as nearly perfect as possible. For cold water the Bottom or Check Valve should be made of leather or rubber, or of a combination of these materials.

The Suction Pipe is the pipe reaching from the Cylinder to the water, and to have the pump work properly should be air tight. The Suction Pipe should be about one-half the diameter of the Cylinder.

Water can not be raised *successfully* by suction more than 25 to 28 feet, although the theoretical distance is 33.94 feet. The Suction Pipe may extend horizontally almost any distance if air-tight. We recommend the use of a Check or Foot-valve with a long vertical or horizontal Suction Pipe.

Turns and Elbows are to be avoided in the Suction or Discharge Pipe, as they cause considerable friction and add to the power required to operate the Pump.

For pumping hot water or liquids, the Pump should be fitted with metal valves, and should be placed as near the supply as possible, in order to force it upward instead of raising it by suction. Hot water or liquids cannot be raised any distance by suction, as the vapor or steam rises into the Pump, instead of the liquid.

✦SPECIAL NOTICE.✦

Each style of Pump, and other article represented in this section of Catalogue, will be designated by a *figure*, and each size represented by a *number*, or stated in inches.

To avoid mistakes, we particularly urge our customers, in ordering pumps, to do so always by the *Figure* and *Number*, rather than by the name of the article.

Our *Numbers* do not always agree with those of other makers, and to avoid misunderstandings as to price, size of bore and capacity per stroke should always be noted. These particulars are given with description of each Pump.

The various parts of all our Pumps are made interchangeable, and perfect fitting repairs can always be supplied. For price list of repairs see page 226.

CISTERN PUMPS.

Fig. 1.

With Brass Valve Seat, Bored and Polished Cylinder, Couplings for Iron and Lead Pipe, Bolted Base and Revolving Fulcrum.

Fig. 1 represents our Long Barrel Cistern Pump. It has a strongly bolted base, with union coupling attachment below, fitted with connections to the brass valve seat for the standard gauge of iron pipe. Accompanying each Pump is also a brass tube, made to pass through the coupling nut and arranged for soldering lead pipe, the Pump being thus adapted to either description of pipe. There is an adequate reservoir above the spout to retain any surplusage of water caused by rapid pumping, thus preventing the possibility of overflow. The Cylinder is bored uniformly round and straight, and afterwards smoothly polished throughout, causing the Pump to work with the utmost ease and efficiency. The Fulcrum and Lever revolve to any point most convenient for use by simply loosening the set-screw shown under the Lever, and by the same process the Plunger can be withdrawn from the Cylinder. By raising the Lever to highest point, lower valve can be tipped to allow water to drain from the body of Pump, rendering it anti-freezing.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

	Each.
No. 0, 2 in. Cylinder, capacity per stroke 1-15 gal., fitted for 1 in. pipe,	\$3 50
No. 1, 2 1/4 in. Cylinder, capacity per stroke 1-12 gal., fitted for 1 in. pipe,	4 00
No. 2, 2 3/8 in. Cylinder, capacity per stroke 1-11 gal., fitted for 1 or 1 1/4 in. pipe,	4 50
No. 3, 2 1/2 in. Cylinder, capacity per stroke 1-10 gal., fitted for 1 1/4 in. pipe,	5 00
No. 4, 3 in. Cylinder, capacity per stroke 1-6 gal., fitted for 1 1/4 or 1 1/2 in. pipe,	5 50

If required for Iron Pipe *only* deduct price of Lead Pipe Coupling. Each, 25 cts.

The James Smart Manufacturing Co., Brockville, Ont.

PITCHER SPOUT CISTERN PUMPS.

COVERED TOP.

Fig. 2.

With Brass Valve Seat, Bored and Polished Cylinder, Couplings for Iron and Lead Pipe, Bolted Base and Revolving Fulcrum.

This illustrates our Improved Covered Top, New Style, Pitcher Spout Cistern Pump. It will readily be noticed that it embodies decided improvements over the Old Style Pitcher Spout Pump, as it is totally impervious to dust or other substances affecting the purity of the water, and also effectually prevents the overflow of any surplusage caused by rapid pumping. These advantages are not the only claims it possesses for superiority over the old style, as the Fulcrum is made stronger and more durable, while the design is handsome and well calculated to give satisfaction. It has a revolving top like Fig. 1, making it either right or left-handed, and is similar to that Pump in the rest of its construction. It is also anti-freezing. We make five sizes, arranged for either lead or iron pipe.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

	Each
No. 1, $2\frac{1}{2}$ in. Cylinder, capacity per stroke 1-10 gallon, for 1 in. pipe, . . .	\$4 25
No. 2, 3 in. Cylinder, capacity per stroke 1-7 gallon, for $1\frac{1}{4}$ in. pipe, . . .	4 75
No. 3, $3\frac{1}{2}$ in. Cylinder, capacity per stroke 1-5 gallon, for $1\frac{1}{4}$ in. pipe, . . .	5 25
No. 4, 4 in. Cylinder, capacity per stroke 1-4 gallon, for $1\frac{1}{4}$ in. pipe, . . .	5 75
No. 5, $4\frac{1}{2}$ in. Cylinder, capacity per stroke 1-3 gallon, for $1\frac{1}{4}$ in. pipe, . . .	6 25

If required for Iron Pipe only, deduct price of Lead Pipe Coupling, Each, 25 cents.

The James Smart Manufacturing Co., Brookville, Ont.

PITCHER SPOUT CISTERN PUMPS.

OPEN TOP. NEW STYLE.

Fig. 3.

With Brass Valve Seat, Bored and Polished Cylinder, Couplings for Iron and Lead Pipe, Bolted Base and Revolving Fulcrum.

This is another form of Pitcher Spout Cistern Pump, the same in all respects as FIG. 2, except that the top is entirely open instead of being partially covered as in that figure.

This style is always sent when Open Top Pitcher Spout Pumps are ordered, unless FIG. 4, page 190, (the older style of this Pump) is specially asked for.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

	Each.
No. 1, 2½ in. Cylinder, capacity per stroke 1-10 gallon, for 1 in. pipe, . . .	\$4 25
No. 2, 3 in. Cylinder, capacity per stroke 1-7 gallon, for 1¼ in. pipe, . . .	4 75
No. 3, 3½ in. Cylinder, capacity per stroke 1-5 gallon, for 1½ in. pipe, . . .	5 25
No. 4, 4 in. Cylinder, capacity per stroke 1-4 gallon, for 1¾ in. pipe, . . .	5 75
No. 5, 4½ in. Cylinder, capacity per stroke 1-3 gallon, for 2 in. pipe, . . .	6 25

If required for Iron Pipe *only*, deduct price of Lead Pipe Coupling. Each, 25 cents.

The James Smart Manufacturing Co., Brockville, Ont.

PITCHER SPOUT CISTERN PUMPS.

OPEN TOP. OLD STYLE.

Fig. 4.

With Brass Valve Seat, Bored and Polished Cylinder, Couplings for Lead and Iron Pipe, Bolted Base and Revolving Fulcrum.

This is the original style of Pitcher Spout Cistern Pump, of which we are the only makers in Canada. Both Top and Spout are entirely open, giving the freest possible passage to the water. Its other features are the same as those of Figs. 2 and 3.

When ordering this Pump be sure to specify Fig. 4, as when "Open Top" is the only description given, we invariably send Fig. 3, page 189.

SIZES, CAPACITIES AND PRICES:

	Each.
No. 1, 2½ in. Cylinder, capacity per stroke 1-10 gallon, for 1 in. pipe, . . .	\$4 25
No. 2, 3 in. Cylinder, capacity per stroke 1-7 gallon, for 1¼ in. pipe, . . .	4 75
No. 3, 3½ in. Cylinder, capacity per stroke 1-5 gallon, for 1½ in. pipe, . . .	5 25
No. 4, 4 in. Cylinder, capacity per stroke 1-4 gallon, for 1¾ in. pipe, . . .	5 75
No. 5, 4½ in. Cylinder, capacity per stroke 1-3 gallon, for 2 in. pipe, . . .	6 25

If required for Iron Pipe only, deduct price of Lead Pipe Coupling. 25 cents each.

WELL PUMPS.

Fig. 7.

ON pages 192 to 198 we illustrate various forms of Improved Iron Well Pumps. Besides being amply strong for the work they have to do, their distinguishing features are (1) Absolute immunity from freezing, through the suspension of their working parts (Cylinder) below the surface of the ground and out of the reach of the frost, and (2) their adaptability for and efficient working in **Wells of any Depth**, attained by the movable Cylinder or working barrel, which can be placed at any depth necessary to bring the distance between its Valves and the surface of the water within the limit of atmospheric pressure. The practical limit of atmospheric pressure is (about) 28 feet, and no pump, however well constructed, can raise water by direct suction a greater height than this. IT IS THEREFORE ALL IMPORTANT THAT THE CYLINDER AND PLUNGER SHOULD NOT BE MORE THAN 28 FEET FROM THE SURFACE OF THE WATER AND TO INSURE EFFICIENT WORKING SHOULD BE WELL WITHIN THAT DISTANCE. When the well is not more than 40 feet deep, certain advantages are secured by submerging the Cylinder at bottom of well as shown in Fig. 7. The Cylinder, when entirely under water, is always primed and in good working order; works more easily and lasts longer as experience has shown. There are also fewer repairs required as a perfect (or nearly perfect) fit of the Valves is not necessary when the pump is working under water. Connection between the Cylinder and Lever is made by $\frac{1}{2}$ -inch round iron, or in the deeper wells by $\frac{3}{8}$ -inch Gas Pipe.

When desired we furnish the Pumps complete with Pipe and all attachments ready for placing in the well. On page 203 will be found the extra charges for this. Foot Valves with strainers, or where Cylinder is submerged, strainers only, should be used with every Pump, the Foot Valves to relieve the strain of the column of water on the Upper Valves, and thus save repairs, and the strainer to prevent possible trouble through sticks or stones, or foreign substances of any kind, getting into the Pipe. Check Valves can be placed at any point in the Suction Pipe for same purpose as Foot Valves.

ANTI-FREEZING WELL PUMPS.

Fig. 5.

OPEN TOP.

FOR WELLS 30 FEET DEEP AND UNDER.

Or by extension of set length to lower Cylinder within 28 feet of bottom, can be used successfully in Wells up to 50 feet in depth.

STANDARD, 36 inches high, has Bolted Base and Revolving Fulcrum. Painted and Striped.

SET LENGTH consists of 3 feet Wrought Iron Gas Pipe (1 1/4 inches interior diameter) Painted Black.

CYLINDER (see Fig. 17, page 202) is 10 inches long (inside), and of various diameters (as per price list.) Has Bored and Polished Interior and Brass Valve Seat, Fitted for Iron Pipe. Painted Black.

A small hole is drilled in Set Length just above Cylinder to allow all water above that point to drain away and prevent freezing.

SIZES, CAPACITIES AND PRICES:

Standards, Set Lengths, and Cylinders, complete as per cut.

	Each.
With 2 1/2 in. Cylinder, capacity per stroke 1-7 gallon, for 1 1/4 in. pipe,	\$7 75
With 2 3/4 in. Cylinder, capacity per stroke 1-6 gallon, for 1 1/4 in. pipe,	8 00
With 3 in. Cylinder, capacity per stroke 1-5 gallon, for 1 1/4 in. pipe,	8 50
With 3 1/4 in. Cylinder, capacity per stroke 1-4 gallon, for 1 1/4 in. pipe,	9 00

Without Set Lengths, 50 cents each less.

Extra Set Length, 1 1/4 in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08 1/4
Foot Valves and Strainers, (Fig. 20) 1 1/4 in.	each, 2 25
Standards only (without Set Length or Cylinder) fitted for 1 1/4 inch pipe,	each, 4 67

ANTI-FREEZING WELL PUMPS.

Fig. 6.

CLOSE TOP.

FOR WELLS 30 FEET DEEP AND UNDER.

Or by extension of set length as described under Fig. 5, can be used in Wells up to 50 feet in depth.

Standard, 46 inches high. Barrel screws into Base. Has Revolving Fulcrum and tight Top, which prevents the entrance of foreign matters, and keeps Pump dust and dirt proof. Painted and Striped.

Set length same as in Fig. 5.

Cylinder same as in Fig. 5.

Hole in Set Length same as in Fig. 5.

SIZES, CAPACITIES AND PRICES:

Standards, Set Lengths and Cylinders, complete as per cut.

	Each
With 2½ in. Cyl., capacity per stroke 1-7 gal., for 1¼ in. pipe,	\$8 50
With 2¾ in. Cyl., capacity per stroke 1-6 gal., for 1¼ in. pipe,	8 75
With 3 in. Cyl., capacity per stroke 1-5 gal., for 1¼ in. pipe,	9 25
With 3¼ in. Cyl., capacity per stroke 1-4 gal., for 1¼ in. pipe,	9 75

Without Set Lengths, 50 cents each less.

Extra Set Length, 1¼ inch,	per foot,	\$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot,	08¼
Foot Valves and Strainers (Fig. 20) 1¼ inch,	each,	2 25
Standards only, without Set Lengths or Cylinders, fitted for 1¼ inch pipe,	each,	5 42

ANTI-FREEZING WELL PUMPS

Fig. 9.

OPEN TOP. WITH BRACE.

FOR WELLS 30 FEET DEEP AND UNDER.

Or by extension of Set Length, 50 feet and under.

Standard, 46 inches high has revolving Fulcrum. Barrel and Base are cast in one piece. Has Brace attached (as per cut) which serves to steady the Pump when in use, and prevent strain on bolts and pipe. Painted and Striped.

The **Set Length** in this Pump is attached to Standard near the Spout, instead of at base. By this means water is more quickly and easily raised, as the Stock of Pump does not require to be filled. Set Length is 3 feet from Base of Pump to Cylinder, and is made of $1\frac{1}{4}$ inch gas pipe, (as in preceding figures) painted black. The opening for pipe at Base is a close fit, and no vibration is possible.

Cylinder same as in Figures 5 and 6.

SIZES, CAPACITIES AND PRICES.

Standards, Set Lengths and Cylinders complete as per cut.

	Each,
With $2\frac{1}{2}$ in. Cyl., capacity per stroke 1-7 gal., for $1\frac{1}{4}$ in. pipe,	\$8 00
With $2\frac{3}{4}$ in. Cyl., capacity per stroke 1-6 gal., for $1\frac{1}{4}$ in. pipe,	8 25
With 3 in. Cyl., capacity per stroke 1-5 gal., for $1\frac{1}{4}$ in. pipe,	8 75
With $3\frac{1}{4}$ in. Cyl., capacity per stroke 1-4 gal., for $1\frac{1}{4}$ in. pipe,	9 25

With Set Length, 50 cents each less.

Extra Set Length, $1\frac{1}{4}$ in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08 $\frac{1}{4}$
Foot Valves and Strainers, (Fig. 20), $1\frac{1}{4}$ in.	each, 2 25
Standards only, (without Set Length or Cylinder,) fitted for $1\frac{1}{4}$ in. pipe,	each, 5 17

ANTI-FREEZING WELL PUMPS.

Fig. 10.

CLOSE TOP. WITH BRACE.

FOR WELLS 30 FEET DEEP AND UNDER.

Or by extension of Set Length, 50 feet deep and under.

Standard 46 inches high, same as in Fig. 9, with exception of Top, which in this Pump is close as in Fig. 6, under which head the uses of Close Top are explained.

Set Length same as in Fig. 9.

Cylinder same as in Figs. 5, 6, and 9.

SIZES, CAPACITIES AND PRICES

Standards, Set Lengths and Cylinders complete as per cut.

	Each.
With 2½ in. Cyl., capacity per stroke 1.7 gal., for 1¼ in. pipe.	\$0 00
With 2¾ in. Cyl., capacity per stroke 1.6 gal., for 1¼ in. pipe.	9 25
With 3 in. Cyl., capacity per stroke 1.5 gal., for 1¼ in. pipe.	9 75
With 3¼ in. Cyl., capacity per stroke 1.4 gal., for 1¼ in. pipe.	10 25

Without Set Lengths, 50 cents each less.

Extra Set Length, 1¼ in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08 ¼
Foot Valves and Strainers (Fig. 20), 1¼ in.,	each, 2 25
Standards only (without Set Length or Cylinder,) fitted for 1¼ in. pipe,	each, 5 92

ANTI-FREEZING WELL PUMPS.

Fig. 8.

SPECIAL CUP TOP (OPEN). WITH BRACE.

FOR WELLS 30 FEET DEEP AND UNDER,

Or by extension of Set Length, 50 feet and under.

Standard 45 inches high, same as in Fig. 9, with exception of Top, which is made with cup for convenience in priming, and Fulcrum which is slightly higher.

Set Length same as in Figs. 9 and 10.

Cylinder same as in Figs. 5, 6, 9 and 10.

SIZES, CAPACITIES AND PRICES:

Standards, Set Lengths and Cylinders complete as per cut.

With 2½ in. Cyl., capacity per stroke 1-7 gal., for 1¼ in. pipe,	Each. \$8 25
With 2¾ in. Cyl., capacity per stroke 1-6 gal., for 1¼ in. pipe,	8 50
With 3 in. Cyl., capacity per stroke 1-5 gal., for 1¼ in. pipe,	9 00
With 3¼ in. Cyl., capacity per stroke 1-4 gal., for 1¼ in. pipe,	9 50

Without Set Lengths, 50 cents each less.

Extra Set Length, 1¼ in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08¼
Foot Valves and Strainers, (Fig. 20), 1¼ in.	each, 2 25
Standards only (without Set Length or Cylinder,) fitted for 1¼ in. pipe,	each. 5 17

ANTI-FREEZING WELL PUMPS.

Fig. 11.

OPEN TOP. WITH BRACE.*

FOR WELLS 100 FEET DEEP AND UNDER

Standard, 48 inches high, extra heavy and strong; has revolving Fulcrum; Barrel and Base all one piece; Nut close to Spout for attaching Set Length same as Figs. 8, 9 and 10; and Brace. Painted and Striped.

Cylinders (see Figs. 18 and 19, page 202), either 14 or 18 inches long as preferred, and any diameter from 2 to 4 inches. Have bored and polished interiors, and Brass Valve Seats. Fitted for iron pipe. Painted black.

Set Lengths for these Pumps, of length suitable to depth of well, can be made from 1½ inch Gas Pipe, for which Stock of Pump and Upper Coupling of Cylinder are fitted.

PRICES:

	Each.
Standard and any size Cylinder (no Set Length), for	
1½ in. Iron Pipe,	\$14 00
Standard only (for 1½ in. pipe),	9 00

Without Brace, 50 cents less.

Gas Pipe for Set Lengths, 1½ in.,	per foot,	\$0 30
Suction Rod, (Wrought Iron or Gas Pipe),	per foot,	08¼
Foot Valves and Strainers (Fig. 20,) 1½ in.	each,	2 50

* Capacity per stroke of all Cylinders used with this Pump is given on page 202.

ANTI-FREEZING WELL PUMPS.

Fig. 12.

CLOSE TOP. WITH BRACE.

FOR WELLS 100 FEET DEEP AND UNDER.

Standards, 48 inches high, (same as in Fig. 11), except top, which is *close*, as in Fig. 10.

Cylinders and Set Lengths same as Fig. 11.

PRICES:

Standard and any size Cylinder, (no Set Length)	
for 1½ in. pipe,	each, \$16 00
Standard only (for 1½ in. pipe),	11 00

Without Brace, 50 cents less.

Gas Pipe for Set Lengths, 1½ in.,	per foot, \$0 30
Suction Rod, Wrought Iron or Gas Pipe, per foot,	08¼
Foot Valves and Strainers (Fig. 20), 1½ in., each,	\$2 50

For capacity per stroke of Cylinders see page 202.

ENGINE WELL PUMPS.

ANTI-FREEZING.

Fig. 16.

FOR WELLS 30 FEET DEEP AND UNDER.

Or by extension of Set Length, 50 feet and under.

Combined Lift and Force Pump, complete with Air Chamber and Coupling at Spout for Hose. Will throw a steady stream of good dimensions from Hose or force water in any direction through pipes. May be used as an ordinary Lift Pump by unscrewing cap on Air Chamber.

Standard, 44 inches high. Barrel Screws into Base, which is fitted to receive 1 1/4 inch pipe. Revolving Fulcrum. Brass Stuffing Box and polished connecting rod. Painted and Striped.

Set Length consists of 3 feet Wrought Iron Gas Pipe, 1 1/4 inch, with hole at bottom to allow water to drain away and prevent freezing. Painted Black. Additional Set Length must be used with Wells deeper than 30 feet.

Cylinder (see Fig. 17, page 202) is 10 inches long (inside), and of various diameters (as per price list), with Bored and Polished Interior and Brass Valve Seat. Fitted for 1 1/4 inch Iron Pipe. Painted Black.

SIZES, CAPACITIES AND PRICES.

Standards, Set Lengths and Cylinders complete as per cut.

	Each.
With 2 3/4 inch Cylinder, capacity per stroke 1-6 gal., for 1 1/4 in. pipe,	\$13 00
With 3 inch Cylinder, capacity per stroke 1-5 gal., for 1 1/4 in. pipe,	13 50
With 3 1/4 inch Cylinder, capacity per stroke 1-4 gal., for 1 1/4 in. pipe,	14 00
With 3 1/2 inch Cylinder, capacity per stroke 1-3 gal., for 1 1/4 in. pipe,	14 50

With 3 feet Rubber Hose (1 in.) and Brass Nozzle, \$3.00 extra.

Extra Set Length, 1 1/4 in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08 1/4
Foot Valves and Strainers, (Fig. 20), 1 1/4 in.,	each, 2 25
Standards only (without Set Length or Cylinder),	each, 9 92

ENGINE WELL PUMPS.

ANTI-FREEZING.

Fig. 14.

COMBINED LIFT AND FORCE PUMP.

FOR WELLS 30 FEET DEEP AND UNDER,

Or by extension of Set Length, 50 feet deep and under.

In these Pumps the Stock and Air Chamber are both cast in one piece with a tub extending downward through the latter, which forms a guide for piston rod and prevent escape of air from Air Chamber. When used as ordinary Lift Pump, set screw in Air Chamber should be removed.

Standard, 51 inches high. Barrel, Base, and Air Chamber all one piece. Has Revolving Fulcrum, Brass Stuffing Box, and Polished Piston Rod, Coupling at Spout for Hose, and Brace. Fitted for $1\frac{1}{4}$ inch pipe. Painted and Striped.

Set Length and Cylinder same as for Fig. 15.

SIZES CAPACITIES AND PRICES.

Standards, Set Lengths and Cylinders, complete as per cut.

With $2\frac{3}{4}$ in. Cyl., capacity per stroke 1-6 gal., for $1\frac{1}{4}$ in. pipe,	\$13 00
With 3 in. Cyl., capacity per stroke 1-5 gal., for $1\frac{1}{4}$ in. pipe,	13 50
With $3\frac{1}{4}$ in. Cyl., capacity per stroke 1-4 gal., for $1\frac{1}{4}$ in. pipe,	14 00
With $3\frac{1}{2}$ in. Cyl., capacity per stroke 1-3 gal., for $1\frac{1}{4}$ in. pipe,	14 50

With 3 feet Rubber Hose (1 in.) and Brass Nozzle, \$3.00 extra.

Extra Set Length, $1\frac{1}{4}$ in.,	per foot, \$0 25
Extra Suction Rod, Wrought Iron or Gas Pipe,	per foot, 08 $\frac{1}{4}$
Foot Valves and Strainers (Fig. 29), $1\frac{1}{4}$ in.,	each, 2 25
Standards only, without Set Length or Cylinder, fitted for $1\frac{1}{4}$ in. pipe,	each, 9 92

The James Smart Manufacturing Co., Brockville, Ont.

ENGINE WELL PUMPS.

ANTI-FREEZING.

Fig. 16.

FOR WELLS 100 FEET DEEP AND UNDER.

When used for lifting only, unscrew Cap on Air Chamber.

Standard, 46 inches high. Barrel and Base in one piece. Has Revolving Fulcrum, Polished Piston Rod, Brass Stuffing Box and Brace.

PAINTED AND STRIPED.

For Cylinders used with this Pump, see Figs. 18 and 19, page 202. All diameters may be used.

Set Length to be made of 1 1/2 inch Gas Pipe of length suitable to depth of Well. Small hole must be drilled in same just above Cylinder to render anti-freezing.

This Pump can be used as Lift Pump only, or as combined Lift and Force Pump, to force water in any direction, or throw a stream of good dimensions from Hose.

SIZES, CAPACITIES AND PRICES:

Standard, Cylinder, 3 ft. Hose, and Nozzle, complete as per cut.

With 3 in. Cyl., capacity per stroke 3-10 gal., for		extra,	\$ 0 08 1/4
1 1/2 in. pipe, each,	\$20 00	each,	2 50
With 4 in. Cyl., capacity per stroke 2-3 gal., for		Without Hose or Nozzle, deduct,	3 00
1 1/2 in. pipe, each,	21 00	Standard only, with Hose and Nozzle,	15 38
Set Length, 1 1/2 in., per foot, extra,	30	Standard only, without Hose and Nozzle,	12 78

WELL PUMP CYLINDERS.

FIG. 17.

FIG. 18.

FIG. 19.

All have Bored and Polished interiors. Painted Black. Fitted for $1\frac{1}{4}$ or $1\frac{1}{2}$ inch pipe, as ordered. When ordering, please give diameter, length and size of pipe coupling wanted.

Any of these Cylinders can be furnished perfectly smooth outside (without bands) for drilled wells, at regular prices.

Any of above can be supplied with Brass Bodies, Iron Caps, at special figures.

FOOT VALVES.

WITH STRAINERS.

Fig. 20.

Fitted with Couplings for Wrought Iron Pipe. Should be used with all Well Pumps at bottom of Suction Pipe to relieve the pressure on the upper Valves, and maintain the column of water at the proper height to enable the Pumps to act promptly. Strainers only should be used when Cylinder is at bottom of Well.

SIZES, CAPACITIES AND PRICES:

2 1/2 inch Bore, capacity per stroke, 1/4 gallon, for 1 1/4 inch pipe,	each, \$11 00
3 inch Bore, capacity per stroke, 1/2 gallon, for 1 1/4 or 1 1/2 inch pipe,	each, 13 00

Fitted for Lead and Iron pipe.

HOUSE FORCE PUMPS.

On Base. With Air Chamber. Two Discharges and Cock.

Fig. 28.

Same as Fig. 27, with Cock attached to lower outlet. Cock is of Iron, with Brass Plug, and has thread cut for 1 in. Hose Coupling.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

2 1/2 inch Bore, capacity per stroke 1/8 gallon, for 1 1/4 inch pipe,	each, \$12 50
3 inch Bore, capacity per stroke 1/6 gallon, for 1 1/4 or 1 1/2 inch pipe,	each, 14 50

Fitted for Lead and Iron Pipe.

Three feet Rubber Hose and Brass Discharge Pipe, fitted to attach to Cock, \$3 00 extra.

HOUSE FORCE PUMPS.

On Plank: With Air Chamber. Two Discharges and Cock.

Fig. 33.

* Same as Fig. 32, with Cock attached to lower outlet. Cock is of iron, with Brass Plug, and has thread cut for 1 inch Hose Coupling.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

2 1/2 inch Bore, capacity per stroke 1/8 gallon, for 1 1/4 inch pipe,	each, \$12 50
3 inch Bore, capacity per stroke 1/4 gallon, for 1 1/4 or 1 1/2 inch pipe,	each, 14 50

Fitted for Lead and Iron Pipe.

Three feet Rubber Hose and Brass Discharge Pipe, fitted to attach to Cock, \$3.00 extra.

HOUSE FORCE PUMPS.

On Base. With Air Chamber. One Discharge.

COMPLETE WITH HOSE AND NOZZLE.

Fig. 29.

Same as Fig. 28, with Cap on Air Chamber substituted for vertical outlet, and $\frac{1}{2}$ Goose Neck Coupling and 3 feet Hose and Brass discharge Pipe in place of Cock.

May be used as an ordinary Cistern Pump by unscrewing Cap on Air Chamber.

PAINTED AND STRIPED.

SIZES, CAPACITIES AND PRICES:

$2\frac{1}{2}$ inch Bore, capacity per stroke $\frac{1}{8}$ gallon, for $1\frac{1}{4}$ inch pipe,	each, \$15 00
3 inch Bore, capacity per stroke $\frac{1}{6}$ gallon, for $1\frac{1}{4}$ or $1\frac{1}{2}$ inch pipe,	each, 16 00

Without Hose and Discharge Pipe, \$3.00 less. Extra Hose, per foot, 33 cents.

Fitted for Lead and Iron Pipe.

The James Smart Manufacturing Co., Brockville, Ont.

HOUSE FORCE PUMPS.
